Statistics and graphs available:
- by type of treatments,
- per client,
- per operator,
- by treated areas
Number of sessions and number of flashes used available.

Option
- Activation of the GSM system to top-up flashes remotely and to follow the evolution of your consumption.

The clients management software
- Management of several operators accounts with follow-up treatments
- Follow-up of the sessions evolution per customer
- Automatic adjustments suggestions in the course of the sessions
- Entering comments related to a care for each customer

CE certified
- Integrated Client Management Software
- Statistics on treatments available

Energy
With Rafale technology
- Worry no more about UV exposure
- Painless and fast
- Easy to use - preset parameters
- CE certified
- Integrated Client Management Software

EXPERT & PRECISION

Made in France
Anthélia® is the result of EFB beauté® technical expertise in IPL. For almost 30 years, EFB has been manufacturing the only devices on the market that ensure a constant level of pulsed light energy throughout the lifespan of their applicators thanks to an exclusive patented process, the SRE.

- Fluidity  ✔  ✔  ✔
  Up to 3 flashes / second
- Security  ✔  ✔  ✔
  Double optical filter
- Precision  ✔  ✔  ✔
  Continual quality and constant performance

Anthélia®, the outstanding performance of EFB beauté® pulsed light. Treatments for face and body...

- Photo-terapeut and anti-aging (SR)
  - Reduces wrinkles and fine lines
  - Stimulates the production of collagen and elastase
  - Firms up and lifts the skin,
  - Unifies the complexion

- Acne® (SR)
  - Treats inflammatory and bacterian acne
  - Weakens the production of sebaceous glands

- Vascular lesions® (SR)
  - Reduces vascular lesions
  - Reduces erythrose
  - Treats spider veins, angiomas and rosacea

- Pigmentary Lesions® (SR)
  - Erases dark spots caused by sun damage
  - Reduces the effects of ageing

- Photo-epilation (HR)
  - Permanent hair removal of dark and brown hair, on fair and dark skins.
  - Reduces excessive hairiness in conditions such as hirsutism and hypertrichosis

- Photo-epilation (HRW)
  - Permanent hair removal of blond/white hair, on fair and dark skins all year long.
  - 72 hrs after sun exposure.
  - Ideal for sensitive and tanned skin.

- Photo-epilation permanent for blond and white hair (SR)
  - Technology and protocol created and patented by EFB.

- Perform hair removal all year long

Perform Rafale photo-epilation in perfect safety and comfort. Your eyes are protected thanks to the new pair of protection goggles available for Anthélia®.

A new EFB patented filter reduces the spectrum of light emitted by IPL 200 times more effectively than standard IPL goggles.

- Ultra fast treatments with 3 flashes every second
- Safety and effectiveness on sensitive and tanned skin thanks to the Rafale photo-epilation

Certified CEC Medical Device marking according to the EEC Directive 93/42/EC
Patented SRE system ensuring the stability of energy
Performance of UV filter with patented DSF system
Easy to use preselected parameters
Real-time reminders of instructions on screen
Easy tracking of the flashes consumption
Gentle and comfortable treatments
Integrated Customer Management Software
10.4 inch, intuitive, ergonomic, color touch-screen in a 4/3 format
Evolutive hardware with the front USB port for software update
Easy maintenance at a low cost
In conformity with international electrical safety regulation
Innovative technology with 17 patents
Compliance with Canadian Medical Devices Conformity Assessment System
Choice of language and local time zone

The assets of Anthélia®

- Effective and long lasting photo-epilation of blond, white, dark hair and very thin hairs
- Tested products and proven performances
- Extended warranty for 3 or 5 years available

Warranty and Service(3)

- 2-year warranty, parts and labor
- Extended warranty for 3 or 5 years available
- Hot Line: Our technicians are available to answer all your technical and practical questions

Total Protect

- Extended warranty for 3 or 5 years available
- Hot Line: Our technicians are available to answer all your technical and practical questions

Compliance with Canadian Medical Devices Conformity Assessment System
Choice of language and local time zone

Made in France

The new method of continuously pulsed light RAFALE technology generates a soft continuous light with low fluencies but high speed.

- Ideal for long-lasting photo-epilation of sensitive skin, the skin is shocked several times to gradually increase the temperature of the hair roots and destroy them.

No more discomfort, the treatment experienced with the RAFALE technology is smooth and brings a pleasant feeling of warmth.

While treatments using Intense Pulsed Light and LASER imply no sun exposure at least 4 weeks before each treatment, the soft RAFALE technology treatment enables to flash tanned skin 72h before and after sun exposure.

RAFALE technology

- Created in 1999, EUROFEEDBACK has been specialised in the design and manufacturing of specific electronic equipments for the Space and Military fields.

In 1994, EUROFEEDBACK started developing a line of professional IPL equipment for the Industry, Medical and Aesthetic sectors.
**Anthélia®, the outstanding performance of EFB beauté®**

Photovascular Treatment(1)

Anthélias® is the result of EFB beauté® technical expertise in IPL. For almost 30 years, EFB has been manufacturing the only devices on the market that ensure a constant level of pulsed light energy throughout the lifespan of their applications thanks to an exclusive patented process, the SRE.

- Fluctuality: Up to 3 flashes / second
- Security: Double optical filter
- Precision: Continual quality and constant performance

The EFB pulsed light energy provides the specific head source necessary to locally reduce the excess of melanin in the skin to eliminate dark spots caused by ageing.

- Above 10 days (in 1 session)
- After 2 sessions

Total Protect

Perform Rafale photo-epilation in perfect safety and comfort. Your eyes are protected thanks to the new pair of protection goggles available for Anthélias®.

A new EFB patented filter reduces the spectrum of light emitted by IPL 200 times more effectively than standard IPL goggies.

Warranty and Service(2)

- 2-year warranty, parts and labor (excluding consumables)
- Extended warranty for 3 or 5 years available
- Hot Line: Our technicians are available to answer all your technical and practical questions

(1) Refer to the contractual terms

Pigmentary treatment(1)

The EFB beauté® filtered light provides the specific head source required to contract small vessels and progressively ensure the disappearance of spider veins and telangiectasia.

- Before treatment
- After 10 days (in 1 session)

Rafale technology

The new method of continuously pulsed light RAFALE technology generates a soft continuous light with low fluences but high speed. Ideal for long-lasting photo-epilation of sensitive skin, the skin is shocked several times to gradually increase the temperature of the hair roots and destroy them.
